About First Healthcare Compliance

First Healthcare Compliance provides solutions, services and education to address the needs of physicians in private practice and those in hospital networks or health systems, skilled nursing facilities and healthcare billing companies to implement and maintain a high quality compliance program in an easy effective and efficient manner.

A privately-owned women business enterprise founded in 2012 in Wilmington, DE by Julie Sheppard, First Healthcare Compliance was created from the rising concern Julie had in witnessing the increasing demands being placed on physicians and other healthcare providers in private practice and in hospital networks and health systems, to comply with the rules and regulations of the Affordable Care Act. As a nurse, an attorney, and a physician's spouse, Julie identified a widening gap between the expectations of government and the reality of compliance for healthcare professionals. She recognized the opportunity available to fill the void of practical compliance resources and options to solve these needs. This became the impetus for the formation of First Healthcare Compliance.
